I built the home at  
in 1978 and still own this property.  
I lived there with my young son until  
1992 and have rented this property  
to a number of young families for  
ten years.

Contaminated water or the fumes  
from it are making my property  
a danger to my renters as well  
as a possible health issue to my  
own family since I lived there  
during the worst years. I  
had cancer in 2000.

Please test as many houses as  
possible to get a true measurement  
of the fume hazard.

I will gladly volunteer my  
property for testing.
